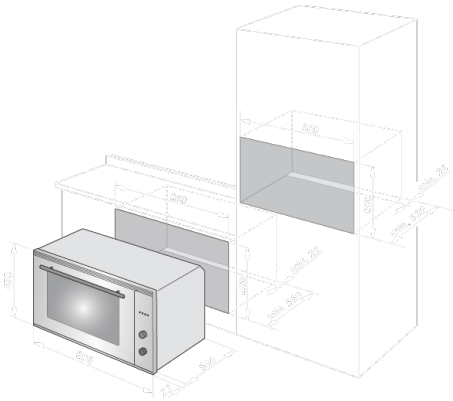
Electric multifunction oven Class A (6 functions):
interior light, defrost, bake, fan bake, grill, fan grill
120 minutes Cut Off minder
Cooling fan motor
Easy removable door
Easy clean enamel
Temperature controlled by thermostat
Safety thermostat
Accessories: 1 shelf, 1 tray
Dimensions: H. 480 mm x W. 895 mm



FEATURES

CLASSE A

Energy rating
De'Longhi cookers have been designed with special care for low Energy consumption. Innovative technologies and insulations allowed Energy consumption performances among the lowest available in the market.

FORNO PRINCIPALE

OVEN LIGHT
The light within the cavity allows to see and check food cooking

TRADITIONAL COOKING
The heat coming from the top and bottom heating elements makes this function ideal for cooking pizzas, cakes, roast of any type and greasy meats like duck and goose.

GRILL
Ideal for browning and grilling food that needs high temperatures on surfaces like veal and beef steaks, filet, hamburger and all vegetables.

FAN GRILL
Using the fan cooking function together with the grill makes gratining and grilling faster, with a better heat distribution, leaving the surface of foods unburnt.

CONVENTION COOKING WITH FAN
Using the fan with top and bottom heating elements spreads heat uniformly inside the oven and is particularly suitable for foods demanding the same level of coking both inside and outside, like rollroasts, legroasts and fishes, also set on different levels.
